

IRONWORKS GOLF ACADEMY

SAM PUTTLAB

Motion researchers and golf professionals joined forces to develop the first computer-aided analysis of the short game using ultrasound measurements. With the SAM PuttLab (SAM = Science and Motion), you have the ability to measure 28 parameters of the putting stroke, a number most golfers probably were not aware of. It marks a new dimension for the analysis and practice of the short game.

FITTING DATA

1. Head design
2. Toe hang/face balanced
3. Putter length
4. Putter lie angle
5. Putter loft
6. Putter weight
7. Putter insert/face
8. Putter grip

STROKE DATA

1. Face angle at address
2. Face angle at impact
3. Club path (horizontal & vertical)
4. Club face rotation
5. Impact spot
6. Stroke length
7. Stroke time
8. Stroke consistency

COST: \$100/HOUR
